PROFILE

Computer Science student with hands-on experience building web and mobile applications using Angular, Flutter, Django REST Framework, and Supabase. Interested in a software development internship involving frontend, mobile, or backend development.

EDUCATION

University of San Jose Recoletos | Cebu City

Bachelor of Science in Computer Science

Relevant coursework: Data Structures and Algorithms, Software Engineering, Database Systems, Operating Systems, Web and Mobile Development.

TECHNICAL SKILLS

Web and mobile: Angular, Flutter, Riverpod

Backend and data: Django REST Framework, FastAPI, Supabase, SQLite

Tools and integrations: Git, REST APIs, authentication, realtime updates, Judge0, Groq

SELECTED PROJECTS

SkyFire

Individual project | *Angular, Django REST Framework, SQLite*

- Built the frontend and backend API for flight search, seat selection, and booking management.
- Implemented the reservation workflow with backend seat validation.

Pulso

Team project | *Flutter, Riverpod, Supabase*

- Built the application scaffold, state-management foundation, and authentication.
- Developed major social feed, profile, saved-content, and realtime features.

mAIstra

Team project | *Supabase, Judge0*

- Built the submission review and grading interface for an instructor-facing teaching workflow.
- Integrated Judge0 code execution and Supabase persistence for review and grading data.

Sige

Individual project | *Flutter, Supabase, FastAPI, Groq*

- Designed and built the coaching interface and service-backed chat integration.
- Designed Tasks and Insights as UI prototypes for the intended accountability workflow.

Bulk Buying Companion

Team project | *Flutter, Riverpod, Supabase*

- Contributed authentication, location-based discovery, Split Board search, realtime updates, and pickup tools.
