Education

University of San Jose-Recoletos Cebu City, 6000 Cebu
Bachelor of Science in Computer Science Expected Graduation: June 2027

- **Relevant Coursework:** Mobile Development 1, 2 and 3, Software Engineering 1 and 2, Data Structures and Algorithm, Information Management 1, Operating Systems, Machine Learning, Applications Development and Emerging Technologies 1 and 2, Automata Theory and Formal Languages

PERSONAL SUMMARY

Computer Science student at the University of San Jose-Recoletos who builds web and mobile applications with Angular, Flutter, Django REST Framework, and Supabase. Experienced in connecting interfaces, APIs, and databases across individual and team projects. Seeking an internship to contribute to development work and learn through collaboration and code reviews.

PROJECTS

SKYFIRE Individual project
Angular | Django REST Framework | JWT | SQLite
A flight-booking web app for finding flights, choosing seats and add-ons, and managing reservations.
- Built the Angular frontend and Django API for flight search, seat selection, add-ons, and booking management.
- Implemented reservation requests with backend seat validation inside database transactions.

PULSO Team project
Flutter | Riverpod | Supabase
A mobile community app for sharing image posts, reacting to updates, and personalizing profiles.
- Built the Flutter application foundation, Riverpod state management, and Supabase authentication.
- Developed image posting, reactions, saved posts, profiles, and realtime features for the community app.

mAIstra Team project
Angular | TypeScript | Supabase | Judge0
A teaching system that extracts handwritten C code for teacher review, execution, and grading.
- Built the web interface for reviewing handwritten C submissions, verifying OCR output, and recording grades.
- Integrated Judge0 execution and Supabase persistence for submission review and grading.

SIGE Individual project
Flutter | Supabase | FastAPI | Groq
An AI accountability coach that helps users turn coaching conversations into practical next steps.
- Built the Flutter coaching interface and chat integration with FastAPI, Supabase, and Groq.
- Designed Tasks and Insights as UI prototypes for planning actions and reviewing progress.

BULK BUYING COMPANION Team project
Flutter | Supabase | Realtime | Geolocation
A mobile app for discovering nearby group buys, reserving a share, and coordinating payment and pickup.
- Implemented authentication, nearby discovery, Split Board search, realtime updates, and pickup tools.
- Built purchase history, reporting, and on-device barcode features; receipt OCR was team work.

TECHNICAL SKILLS

Languages: TypeScript, Dart, Python
Web and Mobile: Angular, Flutter, Riverpod
Backend and Data: Django REST Framework, FastAPI, Supabase, SQLite
Tools and Integrations: Git, REST APIs, JWT, Supabase Realtime, Judge0, Groq
